PRESSURE GAUGES
MAN-40

DESCRIPTION

The ADCA MAN-40 are reliable and cost-effective, general purpose bourdon tube pressure gauges designed for pressure measurement of liquid and gaseous media. They have a nominal size diameter of 40mm, units marked in bar, steel case and polycarbonate window screen.

MAIN FEATURES

Designed according to EN 837-1.
Backside centric connection.

OPTIONS: Bottom radial connection.
Complete stainless steel construction.

USE: Non-viscous and non-crystallizing liquids and gases compatible with copper alloy.

AVAILABLE MODELS: MAN-40.

SIZES: 1/4".

CONNECTIONS: ISO 228.

MEASURING RANGES: 0 to 2,5 bar; 0 to 4 bar; 0 to 6 bar; 0 to 10 bar; 0 to 16 bar; 0 to 25 bar; 0 to 40 bar.

LIMITING CONDITIONS	
Accuracy	±1,6% FS
IP rating	IP 43
Maximum allowable pressure	Full scale reading
Maximum operating temperature	60 °C
Ambient temperature	-10 to 60 ºC
