

CULINARY STEAM FILTER HOUSINGS

ISC20i and ISC20i2 (Steam and gases)

DESCRIPTION

The ADCAPure ISC20i and ISC20i2 high efficiency filters are used to remove contaminated particles from gases such as steam and compressed air.

The optimized construction of these units offers low differential pressure at high flow rates.

All sizes are built in two halves, with 1/4" to 3" being joined by a sanitary clamp ferrule according to DIN 32676 Series A. Whereas 4" to 6" are joined by bolts and nuts. All sizes include plugged drain and vent connections.

MAIN FEATURES

Clamped body.

Fabricated from AISI 316L or CF8M for corrosion resistance and long service life.

Optimized flow paths for low pressure drop and high throughput.

Designed to comply with FDA and 3A sanitary standards for culinary steam.

STANDARD SURFACE FINISH

Internal wetted parts upstream of filter elements:

≤ 1,6 µm Ra for model ISC20i.

As casted for model ISC20i2.

Internal wetted parts downstream of filter elements:

≤ 0,76 µm Ra – SF3, for all models.

External:

Satin bead blast finish. As casted body for model ISC20i2.

Other surface conditions see TIS.GIA – General information ADCAPure.

USE: Steam, compressed air and other gases.
