

Safety Blocks SB Series

These safety devices, which are essential to preserve the accumulator from phenomena of overpressure, are provided of a valve of maximum pressure settled in the factory at different values and of a discharge valve which is available in manual and electric version or manual only.

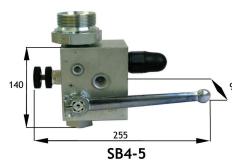

Hydraulic diagram of manual version

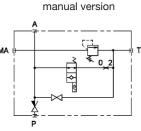

P 0 2 0 0 T

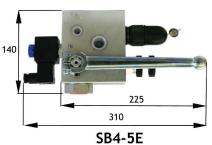

Hydraulic version with manual end electric command

Hydraulic diagram of

Hydraulic version with manual end electric command

Technical Features:

Max. working pressure: 350 bar

Body: in zinc-coated forged steel

Standard execution: - Isolation ball valve - Safety relief valve

- Drain port - Gauge port

- Electric solenoid valve for accumulator discharge

Working temperature: from -20 $^{\circ}$ C to +80 $^{\circ}$ C

Special execution: - Safety valve /TÜV test inspected

- SAE flange or CETOP connecting

for SB5 and SB6 type

| Article No. | Size/Range | Price | | | |
|-------------|-------------|---|--|--|--|
